

- (i) Opium.
- (ii) Baryta-carb.
- (iii) Alumina.

II. (a) A woman aged about 30 years complains of pain and swelling in the interphalangeal joints. Discuss the differential diagnosis.

(b) What is the miasmatic background of the above mentioned disorder, and discuss the line of management. Write the indications of:

- (i) Rhus tox.
- (ii) Caulophyllum.
- (iii) Medorrhinum.

III. (a) A man aged about 25 years complains of dry scaly eruptions on some parts of the body. How do you arrive at the diagnosis?

(b) What is the miasmatic approach to skin disorders as laid down by Hahnemann? Discuss the line of treatment and give the indications for:

- (i) Petroleum.
- (ii) Graphites
- (iii) Ars-iodide.

IV. (a) A patient is brought to you with Oedema; Albuminuria; and Hypertension. How do you proceed with the diagnosis?

(b) Give the miasmatic background of the above mentioned case and discuss the line of treatment. Write the indications of the following drugs.

- (i) Apis. Mel.
- (ii) Kali-Carb.
- (iii) Terebenthina.

V. (a) A lady aged about 35 years complains of Orthopnoea nocturnal dyspnoea, and oedema of the feet. Discuss the differential diagnosis, and investigations you would like to suggest.

(b) State the miasmatic background and scope of Homeopathy in such a disorder. Discuss the line of treatment and give the indications for:

- (i) Naia.
- (ii) Kali-carb. (iii) Digitalis.

V. (a) A man aged about 25 years is observed to be talking to imaginary persons and behaving inappropriately. Discuss the differential diagnosis, and suggest the investigations needed.

(b) How do you classify this disorder as per the Hahnemann classification and discuss the line of management as laid down by Hahnemann. State the indications for.

- (i) Hyoscyamus.
- (ii) Veratrum album.

### **FINAL YEAR B.H.M.S. DEGREE EXAMINATION, MARCH/APRIL 1997**

#### **Paper I—PRACTICE OF MEDICINE**

1. A lady aged about 30 years is brought to you with enlarged thyroid gland, associated with anxiety, palpitation and tremors. How do you diagnose the case? What are the investigations you suggest? Discuss the differential diagnosis. Write the indications of the following drugs.

- (a) Iodum. (b) Mercurius.
- (c) Thyroidinum. (d) Spongia-Tosta.

2. A patient aged about 30 years is brought to you with pain in the epigastrium. How do you diagnose the case? What are the investigations you suggest to diagnose the disease? Discuss the differential diagnosis. Write the indications of the following drugs.

- (a) Nux-Moschata. (b) Ars-Album.
- (c) Lycopodium. (d) Argentum-Nitricum.

3. Describe the aetiology, clinical features, course and prognosis of 'Marasmus'. How do you manage the case ? Write the indications, of the following drugs  
 (a) Abrotanum. (b) Iodum.  
 (c) Silicea. (d) Sarasaparilla.
4. Describe the aetiology, clinical features, complications and differential diagnosis of 'Malaria'. Describe the various methods to prevent the disease. What is your miasmatic diagnosis ? Write the indications of the following drugs  
 (a) Chininum Sulph. (b) Eupatorium-perfoliatum.  
 (c) Gelsemium. (d) Cinchona.
5. Describe the aetiology, clinical features and haematological features and differential diagnosis of Leukaemias. What is your miasmatic diagnosis ? Explain the prognosis of the disease ? Write the indications of the following drugs  
 (a) Acid-nitricum. (b) Lachesis  
 (c) Kreosote. (d) Ars-album.
6. A patient aged about 65 years complains of non-productive cough of two months duration with left sided chest pain and clubbing of fingers. What is your clinical and miasmatic diagnosis ? What are the investigations you suggest for the diagnosis of the disease ? Write the indications of the following drugs  
 (a) Thuja. (b) Conium.  
 (c) Iodum. (d) Hydrastis.

**FINAL YEAR B.H.M.S. DEGREE EXAMINATION, MARCH 1997**  
 Paper II—PRACTICE OF MEDICINE

- 1.(a) Define Hemicrania ? Describe the aetiology, clinical features and differential diagnosis of 'Hemicrania'.  
 (b) Is it a one sided disease ? How do you classify this disease as per the classification of 'Hahnemann' ?  
 Give the indications of the following drugs  
 (a) Sanguinaria. (b) Iris versicolor.  
 (c) Natrum-mur. (d) Spigelia.
2. (a) A patient aged about 30 years is brought to you with pain in the right lumbar region and Haematuria. Discuss the differential diagnosis. What are the investigations you suggest?  
 (b) How do you plan to treat the disease ? Write the indications of the following drugs:  
 (a) Osimum. (b) Cantharis.  
 (c) Terebinthinum. (d) Phosphorus.
3. (a) Describe the aetiology, clinical features and differential diagnosis of "Chorea"  
 (b) What is the miasm involved in 'chorea'? Give the indications of the following drugs.  
 (a) Agaricus. (b) Tarentula.  
 (c) Mygale. (d) Zincum-met.
4. (a) Define Myocardial infarction? Describe the aetiology, clinical features and complications of myocardial infarction.  
 (b) How do you manage the case ? Write the indications of the following drugs  
 (a) Cactus. (b) Lilium-tigr. -  
 (c) Spongia. (d) Lachesis. -
5. (a) Describe the aetiology, pathogenesis and signs and symptoms of 'osteo-arthritis'. Discuss the differential diagnosis?  
 (b) What is the miasm involved in osteo-arthritis. Write the indications of the following drugs  
 (a) Ledum. (b) Rhus-tox.  
 (c) Pulsatilla. (d) Medorrhinum.
6. (a) Describe 'Eczema'.  
 (b) What is the miasm involved in Eczema? How do you classify Eczema as per Hahnemann classification of

diseases. Write the indications of the following drugs.

- (a) Graphites. (b) Ars-Album.
- (c) Petroleum. (d) Clematis.

**FINAL YEAR B.H.M.S. DEGREE EXAMINATION, DECEMBER 1997**

Paper I—PRACTICE OF MEDICINE

I. Give an account of the clinical presentation, diagnosis with differential diagnosis, possible complications and management of Mumps, mention the use of Rhustox, Mere. Sol., Lachesis and Pilocarpus.

II. A 30-years old obese lady requests investigations and management of obesity. Discuss the endocrine disorders to be ruled out. Consider the complications and management of obesity.

III. Describe the clinical features and complications of Peptic ulcer. What are the general and therapeutic lines of management?

IV. Discuss the aetiology, symptoms and signs, and varieties of Pulmonary fibrosis. Outline the causes of Exertional dyspnoea.

V. Classify Leukemias. Give an account of the aetiopathogenesis, clinical picture and management of Acute monoblastic leukaemia.

VI. Write notes on

- (a) Polycythaemia.
- (b) Widal test.
- (c) Yellow fever.
- (d) Therapeutics of whooping cough.

**FINAL YEAR B.H.M.S. DEGREE EXAMINATION, DECEMBER 1997**

Paper II—PRACTICE OF MEDICINE

I. Classify Arthritis, giving examples. Give the clinical manifestations, investigations and management of Osteoarthritis.

II. Illustrate the various manifestations of Ischaemic Heart Disease. Outline the investigations carried out routinely in such a case.

III. Discuss the various causes of Headache. Describe the clinical picture, complications and management of Migraine, mentioning the use of Iris vers., Sanguinaria, Cedron and Psorinum.

IV. Describe the aetiology, clinical presentation and diagnosis of Schizophrenia. Outline Dr. Hahnemann's guidelines in the management of Mental diseases.

V. Bring out fully the aetiopathogenesis and clinical picture of Eczeme, mentioning the varieties. Suggest the general and therapeutic measures in management.

VI. Write notes on:

- (a) Uraemia.
- (b) Motor neurone disease.
- (c) Wolf-Parkinson-White syndrome.
- (d) Startle reflex.

**FINAL B.H.M.S. DEGREE EXAMINATION, JUNE 1998**  
PRACTICE OF MEDICINE—Paper II

I. Describe the clinical manifestations, diagnosis, differential diagnosis and management of Rheumatoid arthritis, giving the use of Bryonia, acid salicylicum, kali iod., and sulphur.

II Classify, giving examples, the various form. of Cardiac Arrhythmias. Differentiate cardiac arrest and cardiac failure.

III Consider the differential diagnosis and investigations to be made in a middle aged man presenting with generalized oedema. Discuss the general and therapeutic management of chronic renal failure.

IV What are the Intra Cranial space occupying Lesions ? Discuss the investigations and differential diagnosis. Suggest the management of a case of cerebral haemorrhage.

V Describe the various forms of Neurosis. Explain the general management, and therapeutic approach.

VI Write notes on:

- (a) Sociopathy.
- (b) Impetigo.
- (c) Midarm circumference.
- (d) Management of renal calculi.

**FINAL YEAR B.H.M.S. DEGREE EXAMINATION, DECEMBER 1998**  
PRACTICE OF MEDICINE—Paper I

1. Describe briefly the clinical picture of AIDS. Write on the scope of Homoeopathy in AIDS.

2. Discuss the various presentation of Diabetes Mellitus at its onset. Explain the role of Homoeopathic Physician in its management and the investigations to be carried out to assess the progress of treatment.

3. Write notes on:

- (a) Tetany.
- (b) Complications of Whooping cough.
- (c) Stool examination in Helminthiasis.
- (d) Management of Kwashiorkor.

4. Describe the aetiology, clinical features and management of Cirrhosis of Liver.

5. Give an account of the Allergic Respiratory Diseases. What role has Homoeopathy in their management?

6. Write notes on:

- (a) A/c Pancreatitis.
- (b) Pel Ebstein fever.
- (c) Eosinophilia.
- (d) Therapeutics of Acid Pepsin disease.

**FINAL YEAR B.H.M.S. DEGREE EXAMINATION, DECEMBER 1998**  
PRACTICE OF MEDICINE—Paper II

1. Discuss the aetiology, clinical features and management of Acute Glomerulonephritis.
2. Give an account of the various clinical presentation of Systemic Hypertension. Discuss the investigations and management.
3. Write notes on:
  - (a) Differentiation of Rheumatoid arthritis and Rheumatic arthritis.
  - (b) ECG.
  - (c) Therapeutics of Renal Calculi.
  - (d) Bed-wetting.
4. Describe the clinical picture, diagnosis and management of Viral Encephalitis.
5. Differentiate the various forms of Pyodermas commonly seen. State the management.
6. Write notes on
  - (a) Differentiation of Depressive Psychosis and Reactive Depression.
  - (b) Psychoanalysis.
  - (c) Management of Paraplegia.
  - (d) Skin scraping. test.

**FINAL YEAR B.H.M.S. DEGREE EXAMINATION, JUNE 1999**  
PRACTICE OF MEDICINE—Paper I

- I. Describe the clinical varieties and diagnosis of Poliomyelitis. What has Homoeopathy to offer in its management and prevention?
- II. An young lady presents with features of hypothyroidism. What symptoms and signs, and investigations help in the diagnosis and differential diagnosis?
- III. Write notes on:
  - (a) Diabetic ketoacidosis.
  - (b) Peripheral blood smear.
  - (c) Sleeping sickness.
  - (d) Management of iron deficiency anaemia.
- IV Discuss the aetiopathogenesis, complications and management of Peptic Ulcer.
- V. Outline the causes of Exertional Dyspnoea in an elderly man. Discuss the investigations and management you would consider in such a case.
- VI. Write notes on:
  - (a) Acute appendicitis.
  - (b) Chronic myeloid leukaemia.
  - (c) Endoscopy.(d) Management of iron deficiency anaemia.

**FINAL YEAR B.H.M.S. DEGREE EXAMINATION, JUNE 1999**  
PRACTICE OF MEDICINE—Paper II

1. Describe the clinical features and diagnosis of Rheumatoid arthritis. Add a note on the management.
2. Classify cardiac arrhythmias. Which of these are seen as complications of myocardial infarction? Add a note on Cardiopulmonary Resuscitation.
3. Write notes on  
(a) Tread test. (b) Nephrotic syndrome.  
(c) BHP. (d) Diarrhoea in children.
4. In the case of a 48 year old man with recurrent headache, discuss the investigations you would suggest to arrive at a diagnosis. Write on the management of tension headache.
5. Describe the various manifestations of allergic skin diseases. Outline the management.
6. Write notes on  
(a) Motorneurone disease. (b) Schizophrenia.  
(c) Bender gestalt test. (d) Behavior therapy.

**FINAL YEAR B.H.M.S. DEGREE EXAMINATION, DECEMBER 1999**  
PRACTICE OF MEDICINE—Paper I

1. Describe the aetiology, clinical features and complications of Influenza. State the Homoeopathic approach in management of fevers.
2. A young woman detected urine sugar on routine examination. Discuss the investigations needed to confirm Diabetes mellitus, mentioning also the differential diagnosis. How is early onset Diabetes managed?
3. Write notes on:  
(a) Algid malaria.  
(b) TFT.  
(c) Management of gout.  
(d) Bleeding gums.
4. Outline the causes of Dyspepsia. How is Peptic ulcer diagnosed and managed?
5. Discuss the aetiopathogenesis, diagnosis and management of Primary complex.
6. Write notes on:  
(a) Lymphadenopathy.  
(b) Von-Willebrand disease.  
(c) Hook-worm disease.  
(d) Oxygen therapy.

**FINAL B.H.M.S. DEGREE EXAMINATION, JUNE 2000**  
Paper I—PRACTICE OF MEDICINE

1. Explain the various clinical presentation, complications and management of herpes zoster.
2. Discuss the clinical features, diagnosis and management of hypothyroidism.
3. Write notes on  
(a) Diabetic coma. (b) Hepatitis E.

- (c) Angular stomatitis. (d) Rickets.
4. Describe the symptoms and signs, diagnosis and management of acute lobar pneumonia.
5. A 50-year old man presents with dysphagia. Consider the various disorder in differential diagnosis, and the possible methods of management in each.
6. Write notes on
- (a) Cholelithiasis. (b) Polycythaemia.
- (c) Management of helminthiasis. (d) Rat-bite fever.

**FINAL B.H.M.S. DEGREE EXAMINATION, DECEMBER 1999**  
PRACTICE OF MEDICINE—Paper II

I. An elderly man is brought with pain and swelling in knees and shoulder joints. Consider the differential diagnosis and investigations. Outline the management of cervical spondylosis.

II. Discuss the diagnosis, complications and management of essential hypertension.

III. Write notes on

(a) Diagnosis of Myocardial Infarction.

(b) Investigations in Urolithiasis.

(c) Convulsions in newborn.

(d) Moro reflex.

IV. Describe the various forms of Involuntary movements. Write on the management of Parkinson's disease.

V. Classify mental diseases, giving examples. Give the clinical picture and management of Schizophrenia.

VI. Write notes on

(a) Management of Eczema.

(b) Tinea cruris.

(c) Sociopathy.

(d) Landry's paralysis.

**FINAL B.H.M.S. DEGREE EXAMINATION, JUNE 2000**  
Paper II—PRACTICE OF MEDICINE

1. Discuss the differential diagnosis of joint pains in a middle-aged individual
2. Describe the investigations, complications and management of essential hypertension.
3. Write notes on
  - (a) Angioplasty.
  - (b) Systolic murmurs.
  - (c) BHP.
  - (d) Pruritus genitalia.
4. Briefly differentiate the major psychiatric disorders.
5. Give an account of the fungal skin disorders seen in our country. Write on the management.
6. Write notes on :
  - (a) CT scan brain.
  - (b) WDP
  - (c) Impetigo.
  - (d) Febrile convulsions in children.

**FINAL YEAR B.H.M.S. DEGREE EXAMINATION, JUNE 2008**  
PRACTICE OF MEDICINE. Paper.1

I. Discuss clinical features, aetiopathogenesis and complications of Groves disease. (10 marks)

II. Write notes on:

- 1 Black water fever.            2 Marasmus.
- 3 Crohn's disease.            4 Bronchiectasis.
- 5 Toxic goitre. (5 x 5 = 25 marks)

III. Write short notes on:

- 1 Filariasis.            2 Whooping cough. 3. Grey turner sign.
4. Fluid thrill. 5 Bullae. (5 x 3 = 15 marks)

Section B

I. Describe causes, clinical features, and complications of C.O.P.D. (Chronic Obstructive Pulmonary Disease). (10 marks)

II. Write notes on:

- 1 Pneumoconiosis.            2 Peptic ulcer.
- 3 Vit B deficiency.            4 Pneumothorax.
5. Amoebic dysentery. (5 x 5 = 25 marks)

III. Write short notes on:

1. Herpes zoster. 2 Haematemesis.
3. Dwarfism. 4 Purpura.
5. Wheezing. (5 x 3 = 15 marks)

**FINAL YEAR B.H.M.S. DEGREE EXAMINATION, JUNE 2008**  
PRACTICE OF MEDICINE. Paper.11

1. Describe in detail Congestive Cardiac Failure along with its clinical features. (10 marks)

11. Write notes on:

1. Dialysis.
2. Jaundice.
3. Tetralogy of Fallot.
4. Phaechromocytoma.
5. Renal Transplant. (5 X 5 = 25 marks)

111. Write short notes on:

1. Bells phenomenon.
2. Lumbar puncture.
3. Kernig's sign.
4. Vitiligo.
5. Coma-vigil. (5 x 3 = 15 marks)

Section B

1V. Describe pathology signs and symptom, complication of Nephrotic syndrome. (10 marks)

V. Write notes on:

1. Heart block.
2. Wilson disease.
3. Sickle cell Anaemia.
4. Marfan's syndrome.
5. Sciatica. (5 x 5 = 25 marks)

VI. Write short notes on:

1. Pulsu paradoxus
2. Aschoffs bodies.
3. Bnouts Reflexi
4. Apex beat.
5. String's sign. (5 x 3 = 15 marks)

**FINAL YEAR B.H.M.S. DEGREE EXAMINATION, JUNE 2008**

PRACTICE OF MEDICINE. Paper.111

I. Define management of malnutrition with Homoeopathic medicine. (15 marks)

II. Differentiate between Anacardium, Lachesis and Cannabis Indica in schizophrenia. (15 marks)

III. Give indications of following in Rheumatoid Arthritis

- 1 Kali lod.
- 2 Rhus tox.
- 3 Colchicum.
- 4 Bryonia. (4 X 5 = 20 marks)

Section B

I. Define management of Jaundice with homoeopathic medicine. (15 marks)

II. Differentiate between sepia, graphites and Rhus tox is Ringworm treatment. (15 marks)

III. Give indication of following in Cholera

- 1 Veratrum album.
- 2 Camphor.
- 3 Podophyllum.
- 4 Arsenic Album. (4 x 5 = 20 marks)

**FINAL YEAR B.H.M.S. DEGREE EXAMINATION, August 2008**

PRACTICE OF MEDICINE. Paper.1

Section A and B should be answered in separate answer-books

Section A

1. Describe the aetiopathology, diagnosis and articular complications of Rheumatoid Arthritis. (5+5+5=15)

2. Write short notes on

- a) Pheochromocytome
- b) Wilson's disease

- c) Tetany
- d) lung function test
- e) Zollinger Ellison syndrome
- f) Beriberi
- g) Clubbing

SECTION-B

3. Define and describe Bronchiectasis. Discuss its diagnosis and complications.(5+5+5=15)

4• Write short notes on

Gout

- a) Exophthalmic goitre
- b) Ulcerative colitis
- c) Diabetic retinopathy
- d) Reitier's disease
- e) Marasmus
- f) Achalasia cardia,

**FINAL YEAR B.H.M.S. DEGREE EXAMINATION, Feb 2009**

PRACTICE OF MEDICINE. Paper.1

**Section A**

I. Discuss the causes, clinical features and complications of Kwashiorkor (10 marks)

II. Write notes on :

- I. Blue-Bloater.    2. Rome Criteria for I.B.S.
- 3. Duodenal Ulcer.        4. Polio.
- 5. B.C.G.Vaccine. (5 X 5 25 marks)

III. Write short notes on

- 1. Simon's foci.    2. H1V.
- 3. Stridor.        4. Chilblains.
- 5. Vitamin C. (5 X 3 = 15 marks)

**Section B**

IV. Give aetiology, clinical feature and complications of Cushing's syndrome. (10 marks)

V. Write notes on:

- I. Suppurative pneumonia.        2. Dyapepsia.
- 3. Reflux Oesophagitis.        4. Loeffler's syndrome.
- 5. Irritable Bowel syndrome. (5 X 5 = 25 marks)

VI. Write short notes on:

- 1. A.D.H. (Anti Diuretic Hormone).        2. Manning's criteria.
- 3. Status Asthmaticus.    4. Vitamin D.
- 5. Candle-grease sign. (5 X 3 = 15 marks)

**FINAL YEAR B.H.M.S. DEGREE EXAMINATION, Feb 2009**

PRACTICE OF MEDICINE. Paper.11

**Section A**

I. Discuss Hemiplegia, its aetiology, pathology and clinical features. (10 marks)

II. Write notes on

- (a) Myasthenia gravis. (b) depression.  
(c) Reiter's disease. (d) Scabies.  
(e) Steatorrhoea. (5 x 5 = 25 marks)

III. Write short notes on

- (a) Brudinski sign. (b) Shenven's sign.  
(c) Dysarthria. (d) Water hammer pulse.  
(e) Telangiectasis. (5 X = 15 marks)

**Section B**

1. Discuss Meningitis with its aetiology, pathology, clinical feature and complications. (10 marks)

II. Write notes on

- (a) Anxiety neurosis. (b) Gonorrhoea.  
(c) Migraine. (d) Multiple myeloma.  
(e) Schizophrenia. (5 x 5 = 25 marks)

III. Write short notes on

- (a) Cyanosis. (b) Pyuria.  
(c) Amnesia nervosa. (d) Phobia.  
(e) Aphasia. (5 x 3 = 15 marks)

**FINAL YEAR B.H.M.S. DEGREE EXAMINATION, Feb 2009**

PRACTICE OF MEDICINE. Paper.111

**Section A**

1. Define management of Angina Pectoris with Homoeopathic medicine. (15 marks)

II. Differentiate between Lachesis, Kaliba and Belladonna in Headache. (15 marks)

III. Give indications of the following in:

1. Apis. 2. Apocynum.  
3. Acetic Acid. 4. Rhus tox. (4 x 5 = 20 marks)

**Section B**

IV. Define Homoeopathic Management of Pneumonia. (15 marks)

V. Differentiate between Hepar sulph. Kali Carb and Arsenic Album in Bronchial Asthma. (15 marks)

VI. Give indications of the following in Malaria

1. China.
2. Arsenic Album.
3. Gelsemium.
4. Eupatorium Perfoliatum. (4 x 5 = 20 marks)

**FINAL YEAR B.H.M.S. DEGREE EXAMINATION, JUNE 2009.**  
PRACTICE OF MEDICINE AND HOMOEOPATHIC THERAPEUTICS (Paper - I)

SECTION - A

1. Describe the aetiology, complications and management of obesity. (5+5+5=15)
2. Write short notes on :
  - a) The vital signs in clinical examination. b) Asbestosis.
  - c) Diagnosis of portal Hypertension. d) Murphy's sign.
  - e) Marasmic Kwashiorkor: f) Tension Pneumothorax. g) Management of Adenoids. (7x5=35 Marks)

SECTION -- B

3. Describe the aetiology, clinical manifestations and management of osteoarthritis. (s+s+s=1s)
4. a) Frostbite. b) Tetany.
  - c) Cushing's disease.
  - d) Ocular manifestation in Rheumatoid arthritis. e) N K. Cells.
  - f) Differential diagnosis of short stature. g) Hyposensitisation. (7x5=35 Marks)

**FINAL YEAR B.H.M.S. DEGREE EXAMINATION, JUNE 2009**  
PRACTICE OF MEDICINE AND HOMOEOPATHIC THERAPEUTICS (Paper - II)

SECTION - A

1. What do you mean by Ischemic Heart Disease? How will you Diagnose and investigate a case of stable Angina Pectoris. (5+5+5=15)
2. Write short notes on :
  - a) Aplastic Anemia. b) Polycythemia.
  - c) Writers Cramp. d) Hydrocephalus. e) Hysteria.
  - f) Alopecia.
  - g) Hirsutism. (7x5=35 Marks)

SECTION - B

3. Describe the Aetiology Clinical features and complications of chronic renal failure. (5+5+5=15)
4. Write notes on :
  - a) Patent Ductus arteriosus. b) Eisenmengers Syndrome. c) Ataxia.
  - d) Schwannoma. e) Paraplegia. f) Lichen Planus.
  - g) Acne Vulgaris. (7x5=35 Marks)

**FINAL YEAR B.H.M.S. DEGREE EXAMINATION, JANUARY 2009.**  
PRACTICE OF MEDICINE AND HOMOEOPATHIC THERAPEUTICS (Paper - III)

SECTION - A

1. Discuss the important medicines for Diabetes mellitus in achieving control and preventing complications.                      15
2. Give the therapeutics of :
  - a) Extrinsic allergic alveolitis b) Haemorrhoids
  - c) Achalasia Cardia
  - d) Post viral arthritis.                      (4x5=20 Marks)
  
3. Write the indications of:
  - a) Colchicum and Benzoic acid in gout b) Iodum and Bromium in goitre
  - c) Fucus vesiculosus and Calcarea in obesity d) Phosphorus and Kali Carb in pleurisy
  - e) Calcarea Sulph and Mercurius in suppurative pneumonia.    (3x5=15 Marks) P.T.O.

SECTION - B

4. Describe the important medicines useful in congestive cardiac failure.15
5. Give the therapeutics of :
  - a) Depressive illness b) Chorea
  - c) Fulminating infantile diarrhoea
  - d) A/c glomerulonephritis. (4x5=20 Marks)
6. Write the indications of :
  - a) Digitalis and Naj a in arrhythmia
  - b) Cholesterinum and Lycopodium in cirrhosis of liver
  - c) Anacardium and Cannabis indica in paranoid schizophrenia
  - d) Stramonium and Cicuta in Febrile convulsions
  - e) Equisetum and Causticum in enuresis.                      (3x5=15 Marks)

**FINAL YEAR B.H.M.S. DEGREE EXAMINATION, JANUARY 2009.**  
PRACTICE OF MEDICINE AND HOMOEOPATHIC THERAPEUTICS (Paper - II)

SECTION - A

1. Define chronic corpulmonale, describe its Aetiology clinical features and complications.                      (5+10=15)
2. Write short notes on : a) Multiple Myeloma. b) Hyper splenism.
  - c) Hemodialysis. d) Hamaturia. e) Verrucae. f)Tinea corporis.
  - g) Electro convulsive therapy (ECT).                      (7x5=35 Marks)

SECTION - B

3. Define multiple sclerosis. Describe its Aetiology, clinical features and complications. (5+10=15)
4. Write notes on:
- a) Coarctation of Aorta.
  - b) Differential clubbing.
  - c) Wilsons disease.
  - d) Biliary cirrhosis.
  - e) Insomnia.
  - f) Patch test.
  - g) Malignant hypertension. (7x5=35 Marks)

**PRACTICE OF MEDICINE AND HOMOEOPATHIC THERAPEUTICS (Paper - III)**

SECTION - A

1. Describe the important medicines used in the management of stroke. 15
2. Give the therapeutics of (4x5=20 Marks)
- a) Palpitation
  - b) Hypertension
  - c) Pernicious anemia
  - d) Cough after measles.
3. Write the indications of (5x3=15 Marks)
- a) Apismel and Arsalb in Filariasis
  - b) Bryonia and Iod:um in pleuresy
  - c) Causticum and gelsemium in poliomyelitis.
  - d) Phosphorus and lachesis in purpura.
  - e) Sulphur and Lycopodium in Hyperlipidemia

SECTION - B

4. Give the important Medicines useful in intestinal amoebiasis. 15
5. Give the Therapeutics of (5x4=20 Marks)
- a) Paraplegia
  - b) Scabies c) Rhinitis d) Insomnia
6. Write the indications of:
- a) China & chelidonium in liver disorders
  - b) Irisversicolor and phosphorus in Pancreas
  - c) Arsenicalb and sulphur in chronic renal failure
  - d) Mercsol and mezerium in pioderma
  - e) Colchicum and nux vomica in dysentery. (5x3=15)
